Remove Vowels

The vowels of the English alphabet are (a, e, i, o, u, A, E, I, O, U). Write an algorithm to eliminate all vowels from a given string.

Input:

The input consists of a string.

Output:

Print a string that excludes all the vowels of the given input string.

Note:

The vowels of the English alphabet are (a, e, i, o, u, A, E, I, O, U).

The input string contains English letters only.

Constraints:

0 <= len <= 100: where len is length of the input string.

Example:

Input:

haveaniceday

Output:

hvncdy

Explanation:

The output string is "hvncdy".
